OilPro

OilPro Isolator / Adapter

MANUFACTURER CODE: V-AI-2

SUPPLIER CODE:

ADVANTAGES & BENEFITS

- Connect serial cable to PC USB port
- Protect expensive equipment from static discharges
- Protect expensive equipment from lightning discharges

APPLICATIONS

- OilPro Oil Management System
- Any device that must connect via serial port to computer

DESCRIPTION

The OilPro Isolator / Adapter is used to connect the OilPro Controller Unit communication cable to the PC.

This product was specifically designed for use with the OilPro Oil Management System and has a built in isolator which protects the equipment from damage that can be caused by static discharges or lightning discharges. In effect, lightning might destroy the OilPro Isolator / Adapter, thereby protecting expensive equipment such as computers or the OilPro Controller Unit.

KEY FEATURES

- Communication Solution for the OilPro Controller Unit
- Isolator Solution for the OilPro Controller Unit.

TECHNICAL DATA

Connection Functionality (either option)	• Connects USB to Isolated RS232 *or* • Connects USB to Isolated RS485
Device Driver	Included
Temperature Range	-25˚ C to 50 ˚ C
Power Supply	From PC
Weight	80 g
Dimensions	70mm (h) x 50mm (w) x 25mm (d)
Input Voltage	5V DC
Output Voltage	RS232 Std
