

## A) The Costing Process Diagrams

A. Integration between OilPro Oil Management System and **Automate**:

*Before Dispensing:*

- Job Cards can be:
1. **edited** for quantity control, price option and times pumped by double clicking job card in Active Jobcard list.
  2. **saved** to accept the changes and keep the job card open for dispensing.

*After Dispensing:*

- Job Cards must be:
1. **checked** for quantity dispensed and price option by double clicking jobcard in list and if correct then;
  2. **close and send to Accounting** the information on the jobcard is then sent to the Accounting system.

- Job Cards must be:
1. assigned valid **New Job Number** from list.
  2. **checked** for quantity dispensed and price option by double clicking job card in list and if correct;
  3. **saved** to accept the changes.

Information will NOT appear on invoice in Automate if the OilPro / Automate integration program is not running!

- Job Card:
1. now has a new job card number.
  2. this job card has to be **opened** by double clicking job card in list and if correct;
  3. **closed and send to Accounting**. The information on the job card is then sent to the Accounting system.
