The OilPro V3 Per-Site Software License:

We have had several requests to install the OilPro Software at workshops where *refurbished* OilPro Systems had been fitted.

The OilPro V3 Software, under the existing **per-site license**, can be installed on **any number of computers at a customer's workshop or site but may not be transferred or re-sold or used at another customer's premises or at another branch of the same company.**

The software license is linked to the customer's Trading Name and works with an activation code. The license fee is **once-off** and open-ended (it does not expire). An **OilPro V3 per-site software license** is required for **each workshop or site** and can be purchased from any OilPro Distributor.

There is currently no maintenance, support or renewal component included in the sales price of the per-site license. Maintenance (i.e. installing the software on new computers in a workshop) is carried out on an ad hoc basis.

A Future release of OilPro Software (expected during 2012) will be **licensed differently**. The license will be renewable **annually**, with a support component included in the licensing fee.

OilPro helps benefit workshops' bottom line!

Oil is an expensive commodity, as is labour! In the United Kingdom, at a Truck Manufacturer Group's recent Dealer Directors Forum meeting, "oil monitoring" was discussed – presenting savings that were being achieved by one of the workshops where an OilPro Oil Management System is in use. **The workshop reported:**

- ✓ *Prevention of stock loss*
- ✓ *A resulting increase in profit made from oil sales; and*
- ✓ *Labour savings/Increased productivity: The OilPro System sends information directly to their Dealer Management Software, preventing duplication of work and the "human error element" - no one "forgets" to charge oil to the customer's account as there is an interaction between the two products.*

Despite the current harsh economic climate and given the cost-effective installation of an OilPro System, an average sized truck workshop can expect to pay back the capital investment for equipment in 2 years. Thereafter, dealers using around 25000 litres of oil per year are in line for cost and efficiency savings of up to **£4000** per year, after maintenance costs.

Says **Bruce Coetzee**, Director, OilPro UK (Ltd): "The drive in the UK at the moment seems to be for efficiency savings and what better way than to fit an OilPro System – it will provide your workshop with far more control over your bulk fluid handling/dispensing while reducing the time spent on trying to keep track of it all."

OilPro integrates with VOLVO GDS

HELPING IMPROVE WORKFLOW AND PRODUCTIVITY IN THE WORKSHOP

We are excited to announce the successful implementation of the *integration link* between the OilPro Oil Management and the Global Dealer System (GDS) software package, which is the Dealer Management System (DMS) used by Volvo Trucks worldwide to manage their parts/stock, labour and invoicing. The integration is installed and in use in several Volvo Dealerships in the United Kingdom.

The integration with VOLVO GDS is the latest in a series of 3rd party integrations, with OilPro also linking to:

- AutoMate
- Kerridge/Autoline
- ACS Embrace

Thank you very much to all our customers for your support during 2010!
We wish you a safe, happy and restful festive time!

OILPRO TRAINING OVERVIEW

Online Training

(Anywhere, Any Time)

Contact martha@oilpro.co.za for more information!

Voucher System

(South Africa only)

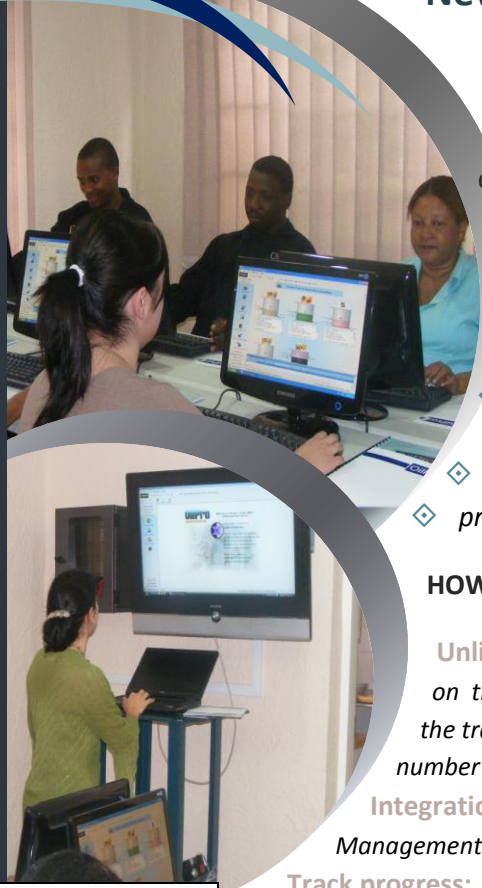

Each OilPro Oil Management Systems is sold with two free software training vouchers, valued at R650 each. Training sessions are scheduled on a regular basis in Gauteng, Cape Town and Durban.

The training vouchers expire after 6 months. According to OilPro Training Manager, Martha Meier, 68 OilPro Software Users received training during 2010, but some vouchers expired unused! We encourage new OilPro users to contact Martha, to take advantage of the free training! We find that a trained OilPro user is just so much better equipped to take advantage of the full functionality of the product!

Basic Training

(On Site!)

Carried out by the installation contractor, as part of commissioning a new OilPro System installation. Aimed at getting the workshop working! Technicians/Mechanics/Stock Clerks and other users are given instruction and user-manuals, on how to dispense oil and how to use the basic software features.

Online Training COST:
R200 per person for the course

Online Course Contents:

- Course 1 - The OilPro Oil Management System
- Course 2 - OilPro Software Logon
- Course 3 - Product Information
- Course 4 - User Information
- Course 5 - Dispensing Utilities
- Course 6 - Job Card Control and Costing

New OilPro Software On-line Training

TRAIN ANYWHERE, ANY TIME!

The OilPro on-line software training was launched during August 2010, with 8 registered users so far.

Available to OilPro Software users, who:

- ◆ do not have time to travel to a training venue
- ◆ live too far from a training venue
- ◆ can access a computer with internet connection (no software installation required)
- ◆ received training before but needs a refresher!
- ◆ prefer remote-access internet-based training

HOW DOES THIS WORK?

Unlimited log-ins allowed: As soon as a user is activated on the training platform he/she has 3 months to complete the training. During this period there is no limit to the number of times any lesson can be accessed.

Integration specific: Tailor-made for the specific Dealer Management System (DMS) integration that the company uses.

Track progress: Know which lessons have been completed and where to resume learning.

Test knowledge: After each lesson, a short test covering each course contents must be completed to test the learning achieved. The tests serve as revision only and can be done twice. For Certification there is a final test covering all lessons. To pass, a minimum score of 70% must be achieved.
