Distributor log-in and support area
For installation and maintenance "how-to" information, technician training info, a technical Q&A Section and more. For OilPro Distributors only. Email us at suport@oilpro.co.za for your username and password.

Our Customers have their say:

- "A very efficient product" - *Parts Manager Pinetown*
- "Wow, I got an SMS warning me that my tank was low on oil. Now I won't run short!" - *Service Manager Johannesburg*
- "I have control over my bulk products for the first time." - *Service Manager Cape Town*
- "The system is running smoothly, thank you." - *Costing Clerk Pretoria*

OilPro Training Dates and Venues, Registration info, Training Objectives, Comments from Training Delegates etc.

OilPro Oil Delivery/Pump-over Service

The OilPro Oil Delivery and Pump-Over Team

The OilPro Oil Delivery and Pump-Over Team is working full steam towards the usual year-end rush, with Operations Manager, **Sharon Laurent** in the driving seat.

Sharon joined OilPro (Pty) Ltd during May 2008, bringing with her 17 years of experience in the areas of logistics / depot operations / transportation.

Sharon has the help of core team members: supervisor **Alfred Ntsebe**, who is known for his experience and his no-nonsense attitude, **Sue Lewis**, who so efficiently deals with the order logging desk, and **Paul Simpson** who takes care of overall management and technical - and system development.

The team deals mainly with the delivering and pump-over of products from 209 liter drums and 910 liter flow bins into tanks installed at vehicle and truck service workshops. The service is offered countrywide (RSA).

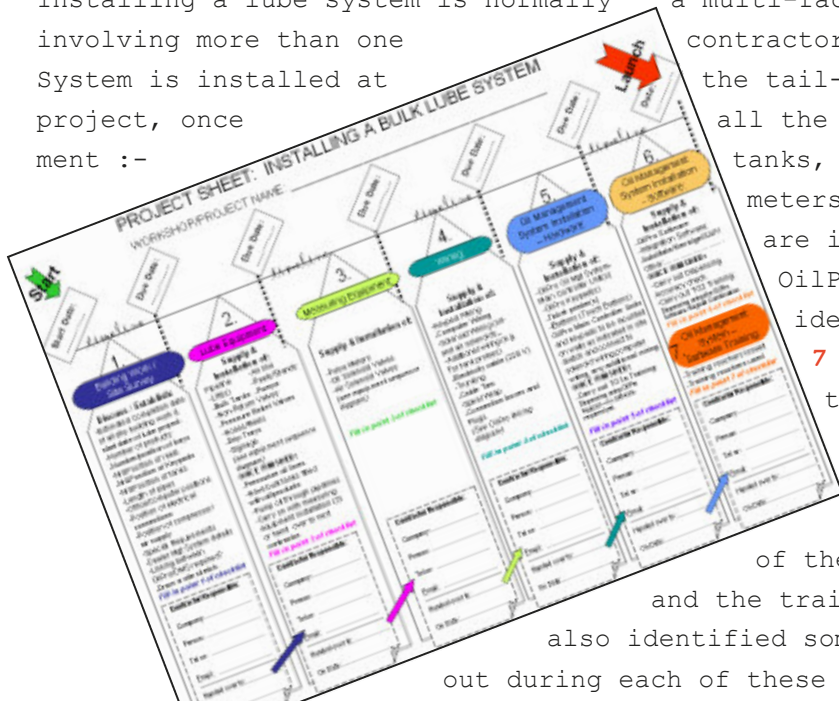

Sharon Laurent, Operations Manager— Oil Delivery and Pump-Over Service.

Contact Sharon at 0861 OILPRO. (RSA only)

NEW PROJECT SHEET / INSTALLATION CHECKLIST

Installing a lube system is normally involving more than one System is installed at project, once ment :-

a multi-faceted project, contractor. The OilPro the tail-end of the all the other equip- tanks, pumps, meters, lifts etc. are in place.

OilPro has identified 7 steps – from the building/ construction work to the installation of the OilPro Software

and the training of the workshop personnel. We also identified some of the **common tasks** to be carried

out during each of these steps. A company (e.g. oil supplier) or a workshop management team, having made the decision to have a controlled bulk oil system installed, can benefit by using this sheet as a **quick guide**: which contractors are to be involved in / responsible for each step of the installation, the project start date, handover due dates between contractors, project finish or launch dates and common tasks. In addition, a short checklist is provided for each of the steps, to help ensure that the hand-over between contractors is a professionally **managed process**.

For more information or for a copy of this tool, email info@oilpro.co.za or call us! Tel nr 011 8920623 or 0861 OILPRO (RSA only)

Visit the **OilPro Stall** in Hall 6 (Fuels and Lubricants) at the **Automechanika Fair**, 18-21 March 2009 at the EXPO Centre, NASREC, Johannesburg, Gauteng. Automechanika is a business-to-business trade show for the aftermarket Automotive industry. www.automechanikasa.co.za

With that NEW SITE **LAUNCH DATE** looming, can you afford to have a badly managed installation process going on at your workshop?

OILPRO UK NEWS

Contact OilPro UK Ltd.: bruce@oilpro.co.uk

The OilPro Oil Management System was on display at the **Commercial Vehicle Show** in Birmingham

during April 2008, as one of the products on the "Automotive Supplies Direct" Stand, generating a good measure of interest in the product.

One of the exciting current projects for OilPro UK is the installation of an OilPro System to control oil products dispensing at the enormous new London Bus vehicle workshop which is currently under construction for **Transport For London**.

London Bus will be moving into the newly built workshop, as their old workshop property was required for

use as part of the Olympic City for the London Olympic Games.

"The order has been received, the equipment design is complete and our installation will commence early 2009 with the builders scheduled to hand over the main building to Transport For London in April 2009" comments **Bruce Coetzee**, Manager and Co-owner of OilPro UK Ltd.

OilPro UK also received orders to install an OilPro System and other customized systems to suit the "remote fueling island" which is to be built near the main bus workshop and is scheduled to be handed over to **Transport For London** towards the end of 2009.
